PROFESSIONAL SUMMARY

AI Full Stack Developer with **3+ years** building production software across FinTech, Pharma and enterprise AI. Ships end-to-end: React/TypeScript interfaces, Python/FastAPI services, and the LLM layer between them, covering RAG pipelines over MCP, realtime voice agents and multi-agent architectures. Deep grounding in **LLM evaluation** (LangSmith, RAGAs, DeepEval) means AI features ship with judge-scored regression harnesses, token-cost accounting and tracing built in. Delivered a **118-DocType Frappe/ERPNext platform**, cut regression cycle time **50%**, and reduced time-to-release **20%**.

PROFESSIONAL EXPERIENCE

Software Engineer, Full Stack & AI | Atrina Technologies

Mar 2025 to Present

Domains: FinTech (Taxation & Consumer) · AI · Pharma | Mumbai

- Build and ship **Frappe/ERPNext** business platforms in Python and JavaScript for approval workflows, OKRs, feedback cycles, subscriptions and credential management, spanning DocType modelling, server-side business logic, reports and customer-facing portal pages.
- Engineered **LangSmith + RAGAs evaluation pipelines** in Python/pytest that score LLM output quality on every change, with per-run **token usage and cost accounting**.
- Delivered AI features across four products: **Planmytax.ai** (AI tax filing, with chatbot, document ingestion and PostgreSQL data validation), **AION** (multi-department enterprise chatbot with agent capabilities), **JasmineLabs** (transcription, translation, summarisation, sentiment analysis and AI-generated MOM email workflows) and **ValenceAi.io** (Pharma AI).
- Built full-stack automation frameworks for web and mobile in **TypeScript**, plus performance (Grafana k6), API (Postman) and security (OWASP ZAP) validation for shipped services.
- Moved from AI QA into full-stack delivery on **AstroFin** (astrofin.ai), rebuilding the customer-facing product in **React 18, TypeScript and Vite**: landing page, mobile-first rework, a sectioned admin console and an analytics dashboard with click heatmaps and funnel reporting.
- Built AstroFin's **first-party analytics pipeline end to end**, from browser instrumentation through a Deno edge function and a 1,297-line PostgreSQL migration to the admin reporting UI, measuring dwell time, scroll depth, click heatmaps, form drop-off and conversion funnels, with internal traffic excluded per session.
- Hardened the same product: closed **three production vulnerabilities** in its data-access and authorisation layers (each proven against the live system before and after the fix), diagnosed a silent guest data-loss incident and added hourly watchdog monitoring, and cut a 9 MB landing page and a 564 kB eagerly-loaded bundle down to size.
- Stood up AstroFin's test infrastructure in **Vitest** (29 files), **Playwright** journeys and **Deno** edge-function suites (51 cases), repairing an end-to-end framework that had never run, with every regression test first proven to fail against the original code.
- Mentor junior engineers on automation, test design and AI evaluation practice; author the documentation and knowledge-transfer material that shortened onboarding.

Software Engineer, Automation | Smartstream Technologies

Nov 2022 to Mar 2025

Domains: FinTech · Invoice Reconciliation · Equity & Payments | Clients: Credit Suisse, Barclays | Mumbai

- Led the full framework migration from BDD Cucumber GWEN to **Playwright + TypeScript**, re-architecting the suite and cutting regression cycle time by **50%**.
- Reached **90%** automated coverage of critical application features; improved pipeline execution speed **20%** and reliability **15%** through CI/CD integration.
- Identified and built automation across teams, raising engineering efficiency **25%** and reducing time-to-release **20%**.
- Owned migration of local infrastructure to **AWS EC2**, covering deployment, environment maintenance and backup strategy.
- Received formal manager appreciation award for performance and process improvement.*

SELECTED PROJECTS (GITHUB.COM/MMC1410001)

MCP RAG Server · Python · Model Context Protocol · ChromaDB · local embeddings
Retrieval-augmented generation exposed as an **MCP server**, giving any AI assistant a searchable memory with grounded, citation-backed answers.

Realtime Voice Agent · Python · LiveKit Agents · OpenAI Realtime · FastAPI
Telephony voice agent with **YAML-driven prompt engineering** for interruption handling, language locking and human escalation.

Frappe Workforce ERP · Frappe/ERPNext · Python · JavaScript
Full HR platform: payroll, attendance, OKRs, project delivery and IT operations, spanning **118 DocTypes, 20 reports and 13 portal pages**.

LLM Prompt Evaluation Harness · Python · LangSmith · LLM-as-judge
Regression harness for production system prompts: **13 judge-scored metrics**, cost and latency tracking, tracing, multi-run consistency mode.

LLM Evaluation Framework · TypeScript · RAGAS-style metrics · k6
Framework for evaluating LLM and RAG applications with a plugin system and multi-format reporting.

Scheme Automation · React · TypeScript · Express · BigQuery · GCS · Cloud Run
Spreadsheet ingestion tool with BigQuery column-schema validation, GCS upload and Cloud Run job triggering.

Notesgen · Python · FastAPI · Gemini · Chrome Extension
Converts course transcripts into structured revision notes; local web UI plus capture extension, exporting to PDF, HTML, Word, Markdown and Google Docs.

QA Agent Architecture · Python · multi-agent systems design
Systems design for a multi-agent AI platform: seven lifecycle agents, event-driven orchestration and saga compensation.

TECHNICAL SKILLS

AI & LLM	RAG · Model Context Protocol (MCP) · AI Agents · Multi-Agent Orchestration · Prompt Engineering · OpenAI · Claude · Gemini · Ollama · LangChain · LangSmith · ChromaDB · Vector Embeddings
LLM Evaluation	RAGAs · DeepEval · LLM-as-Judge · Chatbot & Voicebot Testing · Token/Cost Accounting · WER/CER · Tracing
Languages	Python · TypeScript · JavaScript · Java · SQL
Frontend	React · Vite · Three.js · Zustand · TanStack Query · React Router · Recharts · HTML5 · CSS3 · Tailwind · shadcn/ui
Backend	FastAPI · Express · Spring Boot · Frappe/ERPNext · REST APIs · pytest
Data	PostgreSQL · MySQL · Supabase (RLS, edge functions, pg_cron) · BigQuery · ChromaDB · DBever
Cloud & DevOps	AWS EC2 · GCP (Cloud Run, GCS) · Azure · Cloudflare Workers · Docker · Podman · Linux · CI/CD · GitHub Actions · Jenkins · Git
Automation & QE	Playwright · Selenium · Vitest · Grafana k6 · Postman · OWASP ZAP · n8n · Jira · Confluence

EDUCATION

PG Diploma in Advanced Computing (PG-DAC), CDAC ACTS, Thiruvananthapuram	2022 · 78.50%
B.E. Civil Engineering, Datta Meghe College of Engineering, Airoli	2021 · 76.63%
